SUBJECT INDEX

- | | |
|---|--|
| Aza cages | Coordination compounds |
| Small aza cages as "fast proton sponges" and strong lithium binders 223 | Redox processes in supramolecular coordination compounds 237 |
| Aza-macrocycles | Electrons |
| Thermodynamic and structural aspects of transition metal compounds. Polynuclear complexes of aza-macrocycles 51 | Paramagnetism and dynamic properties of electrons and nuclei 281 |
| Carboxypeptidase A complexes | Equilibrium constants |
| X-ray diffraction studies on carboxypeptidase A complexes: the zinc stereochemistry 309 | Mathematical algorithms and computer programs for the determination of equilibrium constants from potentiometric and spectrophotometric measurements 389 |
| Coordination compounds | |
| Coordination compounds and life processes 163 | |

"Fast proton sponges"

Small aza cages as "fast proton sponges" and strong lithium binders 223

Heterodinuclear systems

Properties and reactivity of homodinuclear and heterodinuclear systems containing single element-element bonds 209

Homodinuclear systems

Properties and reactivity of homodinuclear and heterodinuclear systems containing single element-element bonds 209

Life processes

Coordination compounds and life processes 163

Lithium binders

Small aza cages as "fast proton sponges" and strong lithium binders 223

Magnetism

Magnetism in Florence 137

Main group elements

Synthesis and reactivity of small mixed clusters formed by transition metals and main group elements 259

Mixed clusters

Synthesis and reactivity of small mixed clusters formed by transition metals and main group elements 259

 np_3 ligand

Structural flexibility and bonding capabilities of the ligand np_3 toward the transition metals 361

Nuclei

Paramagnetism and dynamic properties of electrons and nuclei 281

Organometallic reactions

Tripodal polyphosphine ligands control selectivity of organometallic reactions 193

Paramagnetic molecules

Advances in the NMR investigation of paramagnetic molecules in solution 1

Polynuclear transition-metal complexes

Some synthetic and theoretical aspects of the chemistry of polynuclear transition-metal complexes 87

Polyphosphine ligands

Tripodal polyphosphine ligands control selectivity of organometallic reactions 193

Pyrazole chelates

Model systems containing pyrazole chelates and related groups: recent developments and perspectives 325

Supramolecular coordination compounds

Redox processes in supramolecular coordination compounds 237

Synthetic polymers

Ionic and ionizable synthetic polymers: interactions in aqueous solutions 29

Transition metal compounds

Thermodynamic and structural aspects of transition metal compounds. Polynuclear complexes of aza-macrocycles 51

Transition metals

Synthesis and reactivity of small mixed clusters formed by transition metals and main group elements 259

Transition metals

Structural flexibility and bonding capabilities of the ligand np_3 toward the transition metals 361

Transition-metal complexes

Some synthetic and theoretical aspects of the chemistry of polynuclear transition-metal complexes 87

Tripodal polyphosphine ligands

Tripodal polyphosphine ligands control selectivity of organometallic reactions 193

Zinc stereochemistry

X-ray diffraction studies on carboxypeptidase A complexes: the zinc stereochemistry 309
